

SONGROW presents Epaqmat

A unique product, premium, resistant and fun to use!

No other grower is able to reach such a dense growth on a so thin substrate !
The most advanced production techniques are being used to offer a genuine innovation!

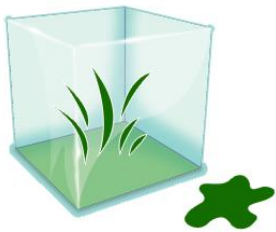

Because Epaqmat is so slim and flexible that you can use it almost anywhere!
(horizontally, vertically, on a rock, on driftwood, etc.).
The only limit is your imagination and creativity. You can even cut it to give it a special shape.

Once planted in your layout, the substrate will become invisible and you will only admire an intense green vegetation attracting the attention !
When we show it on exhibitions, it is flashed like a star on a red carpet...

Epaqmat is available in green wall and green carpet sizes.
It comes with EpaqFix, a unique system to fix it on the aquarium's glass.

With the new blister packing it can be hanged and sold out of water in the shop!

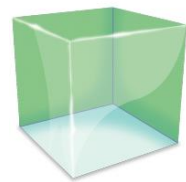

New blisters self-service!

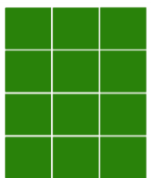

Green touch long

4 x 13 cm

Green wall

16.5 x 13 cm
